1 FINDINGS AND CONCLUSIONS

Professional Service Industries, Inc. (PSI) performed a Phase I Environmental Site Assessment (Phase I ESA) of the property located at the northwest corner of Highway 62 (Twenty Nine Palms Highway) and Sunburst Street in Joshua Tree, California. The assessment included a Phase I ESA only. PSI performed the assessment to comply with the contract between PSI and Dynamic Development Company, LLC.

Currently, the subject property consists of an approximately 1.37-acre parcel of vacant land located at the northwest corner of Highway 62 and Sunburst Street. At the time of site reconnaissance, no evidence of hazardous material usage or storage was observed on the subject property. Historical resources indicate that the property has not been previously developed.

The subject property is located within an area primarily developed for residential use. Uses of adjoining properties include: residential homes to the north, Sunburst Street followed by vacant land to the east, Highway 62 followed by a residential home to the south, and vacant land to the west.

Historical resources indicate that by 1952, the present day residential structures on the northern and southern adjoining properties were constructed. The eastern and western adjoining properties have remained undeveloped vacant land.

1.1 PHASE I ESA

PSI performed the Phase I ESA in general conformance with ASTM E 1527-05. Limitations, exceptions, and deviations from this protocol are discussed in Section 3.

1.1.1 OPINIONS

Significant Data Gaps

Based on our experience, the information that we gathered and evaluated did not present significant data gaps that affected our ability to identify recognized environmental conditions (RECs) in connection with the subject property.

Recognized Environmental Conditions

This assessment revealed no evidence of recognized environmental conditions in connection with the property.

1.1.2 ENVIRONMENTAL PROFESSIONAL DECLARATIONS

Mr. Eric Fraske, gathered and compiled information contained in this report and performed the site and area reconnaissance.

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

I have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312.

Mr. Eric Fraske

Environmental Professional

Assessor

Reviewed By:

Mr. Lloyd Guss, PG

Environmental Professional

Principal Consultant

1.2 RECOMMENDATIONS

PSI recommends no further assessment of the property at this time.

This summary does not contain all the information presented in the full report. The report should be read in its entirety to obtain a more complete understanding of the information provided and to aid in any decisions made or actions taken based on this information.

2 INTRODUCTION

2.1 CONTRACT

The contract between PSI and our Client is summarized below:

Summary	
Client	Dynamic Development Company, Inc.
Authorizing Party Title	Mr. Michael Ward VP, Director of Development
Engagement Date	May 10, 2011

PSI considers the client to be the 'User' of our assessment, defined in the Practice as:

"The party seeking to use Practice E 1527 to complete an environmental site assessment of the property. A user may include, without limitation, a potential purchaser of a property, a potential tenant of property, an owner of property, a lender or a property manager. The user has specific obligations for completing a successful application of this practice...."

2.2 PURPOSE OF SERVICES

Based on the information provided, PSI understands that your purpose for having the Phase I ESA performed is to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability (hereinafter landowner liability protections or LLPs). The scope of services presented below is intended to satisfy this purpose.

PSI performed the Phase I ESA in general conformance with ASTM E 1527-05, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (the Practice). The purpose of the Practice was to define good commercial practice for conducting an environmental site assessment and as such, the Practice is intended to permit the user to satisfy one of the requirements to qualify for the LLPs. The goal of the processes established by the Practice is to identify recognized environmental conditions (RECs) in connection with the property.

2.3 STANDARD OF CARE AND WARRANTIES

Our services were not intended to be technically exhaustive. There is a possibility that with the proper application of methodologies, conditions may exist on the property that could not be identified within the scope of the assessment(s) or that were not reasonably identifiable from the available information.

No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with the property. The ESA was intended to reduce, but not eliminate uncertainty regarding the potential for RECs in connection with a property.

Our report is based on commonly known and reasonably ascertainable information, including limited ground-level visual inspection of the property, except where otherwise explicitly indicated, in conformance with ASTM E 1527-05. Findings and conclusions derived from the methodologies described in the Practice contain all of the inherent limitations in the methodologies that are referred to in the Practice.

PSI did not perform any exploratory probing or discovery, perform tests, operate any specific equipment, or take measurements or samples to perform the ESA scope. The ESA was not a building code, safety, regulatory or environmental compliance inspection. The ESA is not intended to reduce the risk of the presence of mold and physical deficiencies conducive to mold nor the risk that mold or physical deficiencies conducive to mold may pose to the buildings and building occupants.

The methodologies include reviewing information provided by other sources. PSI treats information obtained from the record reviews and interviews concerning the property as reliable and the ASTM protocol does not require PSI to independently verify the information. Therefore, PSI cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. No other warranties are implied or expressed.

PSI warrants that the findings contained in this report have been prepared in general conformance with accepted professional practices at the time of report preparation as applied by similar professionals. Future changes in standards, practices, or regulations cannot be anticipated and have not been addressed.

The observations and recommendations presented in this report are time dependent, and conditions will change. This report speaks only as of its date.

2.4 USE BY OTHER PARTIES

This report was prepared pursuant to a contract between PSI and its client. That contractual relationship included an exchange of information about the property that was unique and serves as the basis upon which this report was prepared. Because of the importance of these understandings, our assessment may not be sufficient for the intended purposes of another party.

Reliance or any use of this report by anyone other than those parties identified above, for which it was prepared, is prohibited and therefore not foreseeable to PSI. Any unauthorized reliance on or use of this report, including any of the information or conclusions contained herein, will be at the third party's risk. No warranties or representations expressed or implied in this report are made to any such third party.

Report of Phase I Environmental Site Assessment PSI Project 0559483 Proposed Commercial Property- Joshua Tree, CA

Third party reliance letters may be issued upon timely request and payment of the thencurrent fee for such letters. All third parties relying on our report, by such reliance, agree that such reliance is limited by our proposal and General Conditions.

3 SCOPE AND RESOURCES

3.1 PHASE I ESA

PSI performed a Phase I ESA of the subject property that generally conforms to the scope and limitations of the Practice. The assessment included four components:

- Records review;
- Reconnaissance;
- Interviews: and
- Preparation of this report, including our evaluation.

The scope of our services and the information resources accessed are detailed below.

3.1.1 **STAFF**

Ms. Stephanie Montgomery of PSI, performed the site and area reconnaissance on June 14, 2011. Mr. Eric Fraske, the supervising project Environmental Professional, supervised planning the site reconnaissance and interviews, reviewed and interpreted the information. Credentials and qualifications of persons responsible for preparation of this report are appended.

3.1.2 RECORDS REVIEW

Physical Setting Sources

PSI reviewed United States Geological Survey (USGS) Topographic (Topo) Maps and other information regarding the physical setting of the site to assist with the interpretation of subsurface water movement near the property.

Summary		
Source Name	Year Published/Issued	
USGS 15 Minute Topo Map	Joshua Tree: 1955	
USGS 7.5 Minute Topo Map	Joshua Tree North: 1972 and 1994	
Soil Survey	EDR: 2011	

Environmental Regulatory Database Information

PSI retained Environmental Data Resources, Inc. (EDR) to provide environmental database information attributed to the site and its surroundings. EDR obtains environmental databases published by local, state, tribal, and federal agencies and geocodes the information for electronic searches. EDR's service includes reporting Standard Environmental Records Sources and, in most cases, some Additional Environmental Records Sources.

The search was performed to Approximate Minimum Search Distances (AMSD) listed in ASTM E 1527-05.

Unmappable (orphan) sites listed with insufficient address or geocoding information for EDR to map were evaluated for potential location within the AMSD. PSI used information provided about the city, county and Zip Code attributed to these sites to determine if they are located in the vicinity of the subject property.

Historical Use Information

PSI used USGS Topo maps and retained EDR to provide information about the history of the site and its surroundings. PSI also referenced other historical sources.

Summary			
Source Type Years Reviewed Source N		Note	
USGS Topo Maps	See Above	USGS	
Aerial Photograph(s)	1952, 1963, 1970, 1989, 1995, and 2005	EDR	
Fire Insurance Maps No Coverage		EDR	
Street Directories 1974, 1984, 1995, and 2007		EDR	
NA = None Available (Not Readily Ascertainable). NR = Not Reviewed. NPR = Not Practically			

NA = None Available (Not Readily Ascertainable). NR = Not Reviewed. NPR = Not Practically Reviewable. Topographic Maps reviewed are previously listed.

Recorded Land Title Records

PSI did not review land title records to obtain information about the current and past owners of the site and prior uses and tenancies.

User-Provided Information

The Practice describes information to be provided by the user, owner and key site manager. This information is detailed on appended questionnaires that PSI sent to the user.

3.1.3 RECONNAISSANCE

Mr. Michael Ward, of Dynamic Development Company, granted PSI access to the site. Our assessor was unescorted during the site reconnaissance.

The ground reconnaissance consisted of observing the periphery of the property and viewing the site from accessible adjacent public access areas. Visual reconnaissance

of adjoining properties was limited to areas and facilities that were readily observable from the subject property or from public access areas.

PSI took photographs to document selected features.

3.1.4 INTERVIEWS

PSI made reasonable attempts to interview selected persons having knowledge of the uses and conditions of the site, past and present. A list of the persons that PSI interviewed and attempted to interview, along with our interpretations is presented in Section 8.

3.1.5 REFERENCES

The information sources that PSI used, including published material, material obtained from commercial sources, from other sources, or provided to us through questionnaires is cited as that information is presented in the report. Some of this information or excerpts thereof is also appended.

3.2 OTHER ENVIRONMENTAL ISSUES

Our services did not include effort outside the scope of the Practice to evaluate issues related to business environmental risk associated with the property.

3.3 SIGNIFICANT ASSUMPTIONS

PSI made the following assumptions in developing our Phase I ESA findings and conclusions:

- Groundwater Flow Direction PSI interpreted and inferred the direction of the shallow groundwater movement based on the information we obtained and our experience. Actual groundwater flow may be locally influenced by many factors beyond the scope of this study. Subsurface investigation would be necessary to determine site-specific groundwater flow direction.
- Regulatory Agency Information PSI considers all information provided by EDR regarding regulatory status of facilities to be complete, accurate, and current.
- Other Regulatory Information PSI considers all other information obtained from regulatory or enforcement agencies to be complete, accurate, and current.
- Title, Lien and Activity and Use Limitation (AUL) Information PSI considers all information provided by EDR, its subcontractors, or other real estate title records review firms regarding property ownership or encumbrances to be complete, accurate and current.
- Interviews PSI considers all information provided through interviews to be complete, unbiased and provided in good faith.

3.4 LIMITATIONS, EXCEPTIONS, DEVIATIONS AND DATA GAP

PSI considers that limitations, exceptions and deviations from the Practice manifest as a lack of or inability to obtain information required by the Practice. This represents the definition of the 'data gap' contained in the Practice.

PSI tracked the components for this assessment on the Data Gap Worksheet, which is appended. Therefore the limitations, exceptions and deviations are identified in the Worksheet.

In general, when required information was incomplete, not provided, otherwise not obtained or indicated a need for additional information, PSI attempted to use information from other sources to meet the Practices' performance objectives. When the data gaps affected the Environmental Professional's ability to identify RECs, PSI considered the data gap(s) to be significant. Any significant data gaps identified by PSI are in the Data Gap Worksheet and reported in Section 1.1.

4 USER-PROVIDED INFORMATION

PSI provided the client with a standard questionnaire. The response statuses are tabulated below. The questionnaires are appended and selected portions are discussed in the following sections.

Summary				
Qı	uestionnaire Retu	ırned? (See Note	es)	
User	Owner	KSM	Other	Questionnaire Name
Y	NS	NS	NS	Appendix X3 "User's Responsibilities"
Y	NS	NS	NS	Section 10.8 "Helpful Documents"
Y	NS	NS	NS	Section 10.9 "Proceedings"
Y	NS	NS	NS	Appendix X3.1 "Suggested Background"

Notes: Y (Yes) /P (Partial) /N (No) /NS (Not Sent by PSI e.g. Party Not Identified)

KSM = Key Site Manager

4.1 USER'S RESPONSIBILITIES

4.1.1 LIENS

The client provided PSI with documentation about liens recorded against the subject property. The information indicated that an environmental lien is not recorded against the subject property.

4.1.2 ACTIVITY AND LAND USE LIMITATIONS (AULS)

The client provided PSI with documentation about AULs recorded against the subject property. The information indicated that an AUL is not recorded against the subject property.

4.2 HELPFUL DOCUMENTS

The client did not provide PSI with prior reports of prior assessments of the site.

4.3 PROCEEDINGS

The client did not provide PSI with documentation about legal proceedings or litigation involving the subject property.

4.4 SUGGESTED INFORMATION

PSI requested certain information about the property to assist with our assessment. Most of this information, such as the nature of the property and its legal description, are presented in the corresponding section of this report.

4.5 FINDINGS

PSI identified no evidence of RECs in the user-provided information.

5 SUBJECT PROPERTY USAGE

5.1 LOCATION AND LEGAL DESCRIPTION

Summary		
Project Name	Proposed Commercial Property	
Property Address	NWC Highway 62 (Twenty Nine Palms Highway) and Sunburst Street	
City, County, State, ZIP Code	Joshua Tree, San Bernardino County, California 92252	
Site Area (acres)	Approximately 1.37 acres	
No. Buildings/Units/Stories	Subject property is currently undeveloped	
Occupied Subgrade Spaces?	NA NA	
Year(s), First Developed for Current Use	NA	

The subject property consists of one rectangular parcel of land that is located at the northwest corner of Highway 62 and Sunburst Street.

5.2 PHYSICAL SETTING

	Summary
Nominal Elevations, (ft, MSL)	2,736 feet
Surface Topo Characteristics	General topographic gradient towards the north/northeast
General Soil Type, Slopes	Hanford coarse sandy loam.
Does EDR Map a Floodplain On-Site?	No
On-Site Water Bodies	None
Off-Site Water Bodies	None on adjoining properties
Note: MSL means Mean Sea Level	

Information regarding the groundwater table was obtained through review of groundwater data published in the EDR GeoCheck report. According to the GeoCheck report, PSI infers that the shallowest groundwater in the vicinity of the subject property occurs at approximately 390 to 422 feet below the ground surface and follows the local surface topography towards the north-northeast.

5.3 CURRENT USES

Currently, the subject property consists of an approximately 1.37-acre parcel of vacant land. At the time of site reconnaissance, no evidence of hazardous material usage or storage was observed on the subject property.

5.3.1 INTERIOR AND EXTERIOR OBSERVATIONS

A summary of uses and conditions is tabulated below. Detailed information is discussed following the summary along with an opinion about the significance of the listing.

		Summary
Ident	tified?	
Yes	No	
	\boxtimes	Hazardous Substances
	\boxtimes	Petroleum Products
	\boxtimes	Aboveground or Underground Storage Tanks (ASTs/USTs)
	\boxtimes	Drums
	\boxtimes	Suspect Containers
	\boxtimes	Electrical or Mechanical Equip. Suspected to Contain PCBs
	\boxtimes	Interior Stains or Corrosion
	\boxtimes	Drains or Sumps
	\boxtimes	Wastewater Discharges
	\boxtimes	Septic or Sewage Tanks
	\boxtimes	Pits, Ponds or Lagoons
	\boxtimes	Pools of Liquid or Standing Water
	\boxtimes	Solid Waste Dumping/Landfills/Suspect Fill Material
	\boxtimes	Stained Soil or Pavement
	\boxtimes	Stressed Vegetation
		Drinking Water Wells
	\boxtimes	Irrigation Wells
	\boxtimes	Monitoring Wells
	\boxtimes	Odors
	\boxtimes	Other Uses or Conditions of Concern

PSI did not observe the above listed uses or conditions on the property during the property reconnaissance.

5.3.2 UTILITIES

No heating ventilating and air conditioning (HVAC) system, sewage disposal system or potable water source was identified on the property.

PSI identified no evidence of RECs in the current uses of the property.

5.4 PAST USES

Our interpretation of the past uses of the property is tabulated below.

Summary		
Year(s) Interpreted Property Use		
1952-2005	Historical aerial photographs and topographic maps depicted the property to be undeveloped vacant land.	
2011	Site reconnaissance indicated the property is undeveloped vacant land.	

Historical resources indicate that the property has not been previously developed. PSI identified no evidence of RECs in the past uses of the property.

6 ADJOINING AND SURROUNDING PROPERTY USAGE

A summary of our interpretation of the current and past uses and conditions of adjoining and surrounding property, based on historical records and observations, is provided below.

Adjoining North		
Year(s) Interpreted Property Use		
1952-2005	Historical aerial photographs and topographic maps depicted the property to be developed with residential homes	
2011	Site reconnaissance indicated the property is developed with residential homes.	

Adjoining East		
Year(s)	Interpreted Property Use	
1952-2005	Historical aerial photographs and topographic maps depicted the property (across Sunburst Street) to be undeveloped land.	
2011	Site reconnaissance indicated the property is undeveloped land.	

Adjoining South		
Year(s) Interpreted Property Use		
1952-2005	Historical aerial photographs and topographic maps depicted the property (across Highway 62) to be undeveloped land.	
2011	Site reconnaissance indicated the property is undeveloped land.	

Adjoining West			
Year(s)	Interpreted Property Use		
1952-2005	Historical aerial photographs and topographic maps depicted the property (across Highway 62) to be undeveloped land.		
2011	Site reconnaissance indicated the property is undeveloped land.		

The subject property is located within an area primarily developed for residential use. Uses of adjoining properties include: residential homes to the north, Sunburst Street followed by vacant land to the east, Highway 62 followed by a residential home to the south, and vacant land to the west.

Historical resources indicate that by 1952, the present day residential structures on the northern and southern adjoining properties were constructed. The eastern and western adjoining properties have remained undeveloped vacant land.

PSI identified no evidence of RECs in the current and past uses of adjoining and surrounding property.

7 ENVIRONMENTAL REGULATORY RECORDS REVIEW

7.1 DATABASE FINDINGS

The distribution of listed sites with respect to the property is tabulated and mapped in EDR's report, which is appended. PSI did not image EDR's results table into the body of this report to reduce the chance for transcription errors. The reader is referred to this table, which can be found near the front of EDR's report.

EDR reported unmappable (orphan) listed sites. PSI reviewed the information EDR provided about these sites, and those that could be field-verified within the AMSD are discussed in the appropriate section below.

7.1.1 SUBJECT PROPERTY

The subject property was not identified in EDR's report.

7.1.2 ADJOINING AND SURROUNDING PROPERTY

EDR did not identify properties adjoining the subject property. EDR did identify properties surrounding the subject property. PSI considered all of the listed sites unlikely to impact the subject property, based upon factors including (but not limited to):

- The nature of the listing,
- The use of the site.
- When the site was listed and its current listed status,
- The developmental density of the setting,
- The distance between the listed and subject sites as related to the distance that releases are likely to migrate based on local surface and subsurface drainage conditions,
- The presence of intervening drainage divides, and
- The inferred groundwater movement.

7.2 OTHER REGULATORY INFORMATION

7.2.1 FREEDOM OF INFORMATION REQUESTS

PSI submitted Freedom of Information requests to the agencies tabulated below. Response status is also tabulated.

Summary		
Response?		
Yes	No	
	\boxtimes	San Bernardino County CUPA
Note: Response status based on date of report.		

PSI identified no evidence of RECs in connection with the other regulatory information.

8 INTERVIEWS

8.1 INTERVIEW PARTIES

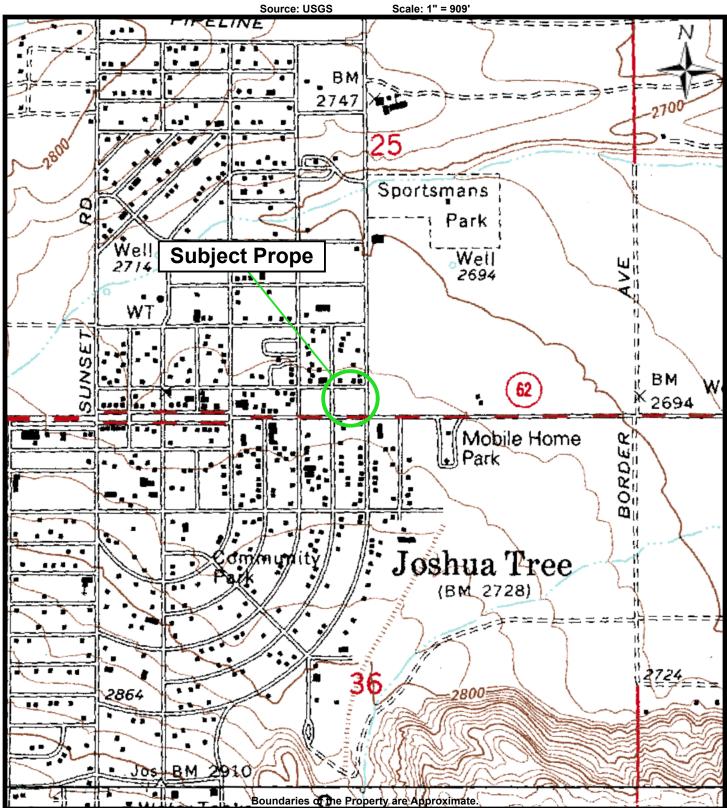

Summary			
Name	Affiliation	Role	
Mr. Mike Ward	Dynamic Development Company, LLC	User	

8.2 INTERVIEW FINDINGS

PSI identified no evidence of RECs in the information obtained from the interviews.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in bold italics are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/11/2011 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
GARRYS TIRE INC	62485 29 PALMS HWY	E 1/8 - 1/4 (0.244 mi.)	B4	10

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System.

A review of the LUST list, as provided by EDR, and dated 03/22/2011 has revealed that there is 1 LUST site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Other Ascertainable Records

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES].

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there is 1 HIST CORTESE site within approximately 0.5 miles of the target property.

Hazardous Waste Summary:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018
Waste name: BENZENE

Waste code: D039

Waste name: TETRACHLOROETHYLENE

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data Source: Rextag Strategies Corp. Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services,

a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary

and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are

comparable across all states. Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

USGS TOPOGRAPHIC MAP

Target Property Map: 34116-B3 JOSHUA TREE NORTH, CA

Most Recent Revision: 1994

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

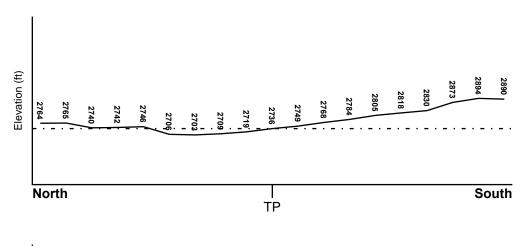

TOPOGRAPHIC INFORMATION

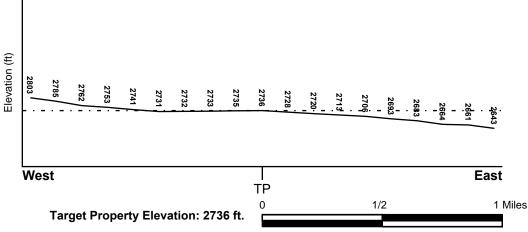

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

Data Coverage

YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

 MAP ID
 FROM TP
 GROUNDWATER FLOW

 Not Reported
 TO GROUNDWATER FLOW

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOLOGIC AGE IDENTIFICATION

Era: Cenozoic Category: Stratifed Sequence

System: Quaternary Series: Quaternary

Code: Q (decoded above as Era, System & Series)

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: HANFORD

Soil Surface Texture: coarse sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep,

moderately well and well drained soils with moderately coarse

textures.

Soil Drainage Class: Well drained. Soils have intermediate water holding capacity. Depth to

water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

	Soil Layer Information						
Boundary				Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	12 inches	coarse sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 6.00 Min: 2.00	Max: 7.80 Min: 5.60
2	12 inches	50 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 6.00 Min: 2.00	Max: 7.80 Min: 5.60
3	50 inches	60 inches	gravelly - fine sandy loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 6.00 Min: 2.00	Max: 7.80 Min: 5.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: sandy loam

gravelly - sandy loam

loamy sand stony - loam

cobbly - loamy sand

Surficial Soil Types: sandy loam

gravelly - sandy loam

loamy sand stony - loam cobbly - loamy sand

Shallow Soil Types: gravelly - loam

very cobbly - loam

Deeper Soil Types: stratified

gravelly - sandy loam weathered bedrock

LOOATION

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map. USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

The EDR Aerial Photo Decade Package

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.

Appendix E: Interview Documentation

From: 3103155422 05/10/2011 18:10 #552 P.004/011

USER QUESTIONNAIRE 1 OF 2

Pursuant to ASTM E 1527-05 Appendix X.3, in order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments), the user must provide the following information (if available) to the environmental professional. Failure to provide the information could result in a determination that "all appropriate inquiry" is not complete. This form represents a type of interview and as such, the user has an obligation to answer all questions in good faith, to the extent of his or her actual knowledge.

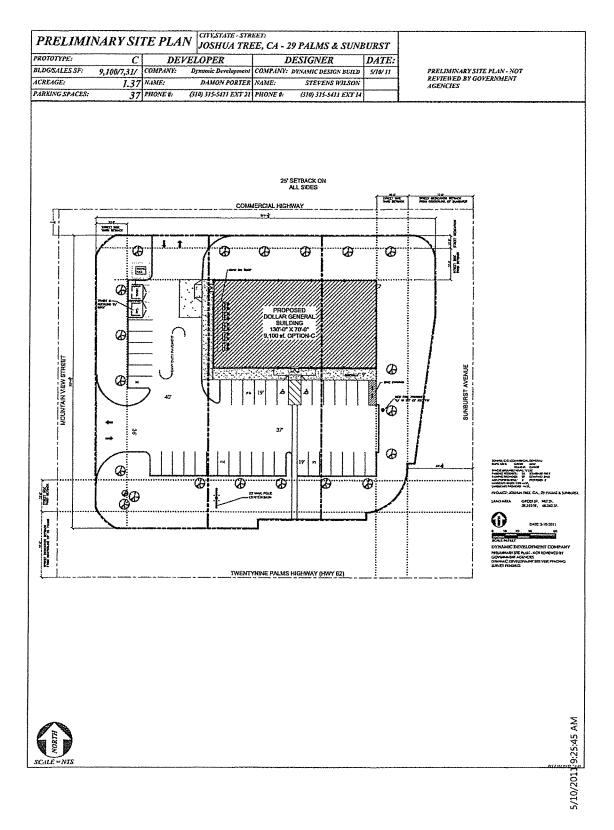

1.	Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law? No Yes If yes, please explain.
2.	Are you aware of any activity and land use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law? No Yes If yes, please explain.
3.	As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? Yes If yes, please explain.
4.	Does the purchase price being paid for this property reasonably reflect the fair market value of the property? No Yes If yes, please explain.
	If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? No
5.	Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user: (a) Do you know of the past uses of the property?; (b) Do you know of specific chemicals that are present or were once present at the property?; (c) Do you know of spills or other chemical releases that have taken place at the property?; (d) Do you know of any environmental cleanups that have taken place at the property? Yes If yes, please explain.
6.	As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property? No Yes If yes, please explain.

From: 3103155422 05/10/2011 18:10 #552 P.005/011

USER QUESTIONNAIRE 2 OF 2

Pursuar or past any per petroleu regardir	nt to ASTM E 1527-05 §10.9, as the user of this ESA do you know of (1) any pending, threatened, litigation relevant to hazardous substances or petroleum products in, on, or from the property; (2) and ing, threatened, or past administrative proceedings relevant to hazardous substances or the products in, on, or from the property; and (3) any notices from any governmental entity any possible violation of environmental laws or possible liability relating to hazardous or petroleum products?
Pursuar	Il Documents Checklist nt to ASTM E 1527-05 §10.8, do you know whether any of the following documents exist related to ject property, and if so, whether copies can and will be provided to PSI for review? Check all that
	Environmental site assessment reports
	Environmental compliance audit reports
	Environmental permits (for example solid waste disposal permits, hazardous waste disposal permits, wastewater permits, NPDES permits, underground injection permits)
	Registrations for above or underground storage tanks
	Registration for underground injection systems
	Material safety data sheets
	Community right-to-know plan
	Risk assessments
	Safety plans; preparedness and prevention plans; spill prevention, countermeasure and control (SPCC) plans; etc.
	Reports regarding hydrogeologic conditions on the property or surrounding area
	Notices or other correspondence from any governmental agency relating to past or current violations of environmental laws with respect to the property or relating to environmental liens encumbering the property
	Hazardous waste generation notices or reports
	Geotechnical studies
	Recorded activity and land use limitations (AULs)

Personnel Qualification

RESUME

Eric C. Fraske, PE

Geotechnical and Environmental Department Manager, Cypress, California

Education

Bachelor of Science: Major-Civil Engineering

Michigan State University: May 2004

Certifications/Registrations/Technical Training

State of California Registered Civil Engineer (PE #76976) Nevada Certified Environmental Manager (CEM # 2134) 40 Hour HAZWOPER

Professional Experience

Mr. Fraske is the department manager for the geotechnical and environmental group of the Cypress, California office of PSI. As department manager, Mr. Fraske oversees all environmental and geotechnical projects. His responsibilities include coordinating personnel and equipment resources to ensure client satisfaction. Mr. Fraske is closely involved with clients, potential clients, and projects in order to form strong alliances and long lasting working relationships. His work involves extensive client contact, program quality assurance/quality control (QA/QC), and liaison with federal, state, and local regulatory agencies.

Prior to joining PSI, Mr. Fraske worked as a field technician for an air quality firm from 2002 to 2004. As a field technician, his work experience included ambient air sampling, gas emissions testing, pollution modeling, compliance demonstrations, TRIS, report development, and industrial air permitting.

Project Experience

Mr. Fraske has conducted many Phase I ESAs for commercial lenders, local and nationwide banks, and real-estate developers. Transactions included mergers and acquisitions, and refinancing.

Representative Phase I Environmental Site Assessments Project Experience

- Over 50 Proposed CVS Locations Throughout Southern California
- Proposed NFL Stadium Locations, Southern California
- Sony Pictures Studios, Culver City, California
- Kodak Theater and Hollywood and Highland Retail Complex, Hollywood, California
- Proposed Extra Space Self Storage Facilities, Throughout Southern California
- FDIC Portfolio Locations, Throughout Arizona
- Pacific Gateway Industrial Center, Torrance, California
- 60,000 Acres of Timberland in South Georgia
- 6,000 Acre Former Cattle Farm, Bleckley County, Georgia
- Five Volvo Equipment Dealerships, Savannah, Macon, Marietta, Atlanta, and Augusta, Georgia
- Various Fiber Optic Cable Sites, Marietta, Georgia
- Multiple Burger King Restaurants, New York, New York

RESUME

Mr. Fraske has performed Phase II Subsurface Investigations and a variety of subsurface investigations for commercial lenders, state environmental protection agencies, and private individuals at several commercial and industrial real estate properties.

Representative Phase II Environmental Site Assessments and Site Investigation Project Experience

- Mira Mar Naval Air Station, San Diego, California
- Former Gasoline Station, Compton, California
- Active Sugar Mill, Clewiston, Florida
- 300 Square Mile Agricultural Land Acquisition, South Florida
- Plating Facility, West Hollywood, California
- Former Western Brass Manufacturing Facility, Los Angeles, California
- Former Dry Cleaner, Garden Grove, California
- Former Auto Dealership, Manhattan Beach, California
- Former Nike Missile Site, Rancho Palos Verdes, California
- Former Wastewater Treatment Plant, Fort Oglethorpe, Georgia
- 6,000 Acre Former Cattle Farm, Bleckley County, Georgia
- Three former gasoline stations, Savannah, Georgia

Mr. Fraske has conducted soil excavations, groundwater sampling, operations and maintenance of total fluids free product recovery systems and soil vapor extraction systems, well surveys, well development, groundwater sampling and effluent sampling of treated groundwater on several impacted properties.

Representative Remediation Project Experience

- Former Gasoline Station, Culver City California
- Former Dry Cleaner, Garden Grove, California
- Former Dry Cleaner, Montclair, California
- Former Plating Facility, West Hollywood, California
- Former Technicolor Studio, Hollywood, California
- Oil Spill, Fontana, California
- Former Auto Dealership, Manhattan Beach, California
- 6,000 Acre Former Cattle Farm, Bleckley County, Georgia
- Former Wastewater Treatment Plant, Fort Oglethorpe, Georgia
- Emory Northlake Medical Center, Tucker, Georgia,
- Peachtree Mitsubishi, Doraville, Georgia

Years experience with other firms: 2
Year started with PSI: 2004

Lloyd D. Guss, PG

Senior Geologist, Long Beach, California

Years with PSI: $5\frac{1}{2}$ Years experience with other firms: $13\frac{1}{2}$

Education

B.Sc. in Geology, California State University, Long Beach, 1992

Certifications/Registrations/Technical Training

California Registered Professional Geologist (No. 7034)
Colorado State Environmental Scientist registration (No. 5618)
Phase II Environmental Site Assessment Workshop, PSI (1999)
Professional Certificate in UST Leak Detection Standards and Systems,
University of California, Riverside (1994)
OSHA 29 CFR 1910.120 HAZWOPER, worker

Professional Experience

For about nineteen years, Mr. Guss has been involved with all aspects of quality project work for environmental and hazardous waste site investigations, risk management, and remediation activities. His responsibilities have included: project management, technical project oversight, project administration and budgeting, upholding company safety standards, regulatory agency liaison, managing and training personnel, data evaluation, and reporting.

California Department of Transportation (Caltrans) Project Experience

Mr. Guss has over eight years of experience providing services to Caltrans under various environmental related contracts. Services have included emergency response, UST removals, hazardous waste management, soil and groundwater assessments, and aerial deposited lead investigations throughout California. Projects have included property acquisition investigations, lead studies of bridge paint and right-of-way soil, and high profile drinking water assessments. Mr. Guss maintains a good working relationship with numerous contract managers at several Caltrans district offices throughout California.

Petroleum Hydrocarbon Project Experience

As Team Leader and Project Manager for environmental work at two major Los Angeles refineries, Mr. Guss was responsible for: a high profile groundwater investigation of Los Angeles aquifers (Gage, Lynwood, and Silverado), an LNAPL recovery optimization program to expand product recovery systems, oversight of air sparge and vapor extraction systems, remedial excavation of approximately 1,000 tons of California Hazardous Waste and reporting to the DTSC, and submitting routine deliverables to the CRWQCB and AQMD.

Landfill Project Experience

Mr. Guss managed a biologically sensitive military landfill remediation/restoration project, which involved the excavation of over 30,000 tons of dioxins, furans, and lead impacted soil. In addition, his team was responsible for initiating a re-profiling program so that soil could be separated and transported to the appropriate waste disposal facility, which resulted in a substantial cost saving for the client. Not only was the project completed under budget, but it was also completed on schedule.

Chlorinated Solvent Project Experience

Mr. Guss has managed a number of chlorinated solvent projects ranging from small dry cleaning facilities to a large chemical company tank farm located in the Port of Los Angeles.
