

San Bernardino County Land Use Plan
GENERAL PLAN
 Geologic Hazard Overlays

SCALE 1:14,400

- Generalized Landslide Susceptibility**
- Low to moderate
 - Moderate to high
 - Mapped Existing Landslide
 - Rockfall/Debris-Flow Hazard Area (Forest Falls Only)

- Zone of Suspected Liquefaction Susceptibility**
- Zone of Susceptibility

- Generalized Liquefaction Susceptibility**
- Low
 - Medium
 - High

- Earthquake Fault Zones**
- Earthquake Fault Zone Boundary
 - County Designated Fault Zones

Map data originally compiled on 1:48,000 scale mosaic maps photo-reduced from 7-1/2 and 15-minute USGS quadrangle maps by the State of California, Division of Mines and Geology, 1987. Geological Survey, 1974 and by S.S. Tan, State Division of Mines and Geology, 1960.

The Zone of Suspected Liquefaction Susceptibility layer compiled by the San Bernardino County Geologist, 2008. Positional accuracy of map data is at best plus or minus 200 feet.

Map data originally compiled on 1:48,000 scale mosaic maps photo-reduced from 7-1/2 and 15-minute USGS quadrangle maps by the State of California, Division of Mines and Geology, 1987. Geological Survey, 1974 and by S.S. Tan, State Division of Mines and Geology, 1960.

Map data compiled on 7-1/2 and 15-minute USGS quadrangle maps by the State of California, Division of Mines and Geology, 1987. Positional accuracy of map data is at best plus or minus 150 feet.

NOTICE: Effective January 1, 1994, the name "Special Studies Zones" has been changed to "Earthquake Fault Zones" and Chapter 7.3, Div. 2 of the Public Resources Code has been renamed the "Acquired-Private Earthquake Fault Zoning Act".
