RE: Joshua tree location inspection

To whom it may concern:

Following are the Joshua tree inspection findings for  
7886 Shafter Avenue, Yucca Valley, Ca:

- 1) The Joshua tree is approximately 8' south of the proposed v-ditch.
- 2) The Joshua tree is approximately 33' southeast of the proposed v-ditch.
- 3) The Joshua tree is approximately 11' northwest of the proposed v-ditch.

It is my opinion that the proposed construction will pose no threat to the health of any Joshua trees. However, I do recommend a 7' circle, with orange fencing, be placed around all Joshua trees within 40' of any proposed construction, to protect the Joshua trees and the rootzone.

Sincerely,

Michael Murphy
