Project Description: (please use a separate page if necessary)

The applicant proposes to extract gold from semi to unconsolidated gravels, sands, and silts (sediments located within placer mining claims managed by the BLM. The sediments have been extensively tested and show economic gold grades suitable for surface mining extraction down to a tested depth of 24 feet, covering approximately 106 acres on 267 acres, across two non-contiguous pits. These two pits are referred to as the western and eastern pits. The proposed operation capacity is to process up to 96,000 cubic yards of material per month.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".
If you have already sent your document to the agency please denote that with an "S".
